## Projects

### Integration of AWS Lambda with API Gateway

April 2024 - Aug 06 2024

- Building and testing of python lambda function on AWS lambda.
- Integrate with the API Gateway.
- Finally Test with the postman.

### RestAPI using NodeJS and MySQL

August 2024 - Nov 05 2024

- Built RestAPIs with Node.js and Express.js, utilizing MySQL for database management.
- Used express-generator to set up the project structure efficiently.
- Established a connection between Node.js and MySQL, and implemented a GET method to retrieve user data.
- Created professional API endpoints, such as "/api/users", to fetch user data using GET methods.
- Conducted thorough testing of API endpoints using Postman to ensure functionality and reliability.
- Implemented robust error handling to provide informative feedback to API end-users.
